PINS

The internal hardness of our new CTP Pins is thicker to ensure better resistance and longer life. They are manufactured out of Chrome-moly alloy steel, and are put through an induction hardness procedure that makes the pin more resistant to extreme wear, prevents corrosion, and maximizes performance. We also use electroplating techniques to apply additional anti-corrosion products and improve their overall strength

Our pins feature:

- Induction Harden zone HRC 56 min to depth 1mm
- Minimum core hardness HRC 22 to 25
- 0.02 to 0.03mm layer of chrome coating on all surfaces of the pin.
- Material; 42CrMo and 35CrMo

Minimum core hardness HRC 22 to 25

Thicker internal hardness

Layer of chrome coating on all surfaces of the pin
